

A premium performance, fast setting, polymer-modified, color consistent and efflorescence free grout specially formulated for grouting all types of ceramic and dimensional stone tiles on walls and floors when grout joint widths are 1/16" and up to 1/2" wide, and eliminating the need for different grout products.

ProGrout is suitable for both walls and floors in residential and commercial projects. Only the addition of water is required. Exceeds ANSI A-118.6 for Latex Modified Portland Cement Grout. Follow the TCNA Handbook and ANSI A108.10 Installation of Grout in Tile work.

How many square feet can I grout?

TILE SIZE	JOINT WIDTH			
	1/8"	1/4"	3/8"	1/2"
2"x 2"x 1/4"	93	50	36	29
4"x 4"x 3/8"	119	61	43	33
4"x 8"x 3/8"	156	81	56	43
6"x 6"x 3/8"	179	89	61	47
6"x 8"x 3/4"	100	51	35	27
8"x 8"x 3/8"	227	119	81	61
10"x 10"x 3/8"	278	147	100	76
12"x 12"x 3/8"	357	179	119	89
15"x 15"x 3/8"	417	208	147	109
16"x 16"x 3/8"	500	250	167	132
18"x 18"x 3/8"	625	278	192	147
20" x 20" x 3/8"	625	313	208	167

The joint width number represents the square foot coverage per 25 lb bags.

GROUT: IT'S NOT JUST FOR AESTHETICS

Today, tile sizes, style, color, composition and areas of use are constantly evolving, and so must the installation products to meet these demands. Using the correct installation product is vital to the success of every tile installation and selecting the right grout is just as important.

Merkrete understands this constant call for better and more innovative products. This is why Merkrete offers such a wide range of specialty grouts... from large format tile to mosaics, for economical to high level sanitary environments, all Merkrete grouts are designed with function and lasting beauty.

Merkrete makes it all possible.

Sample colors shown are approximate to the final grout color. Final installed grout color may vary due to job conditions, tile porosity, mixing ratio, sealers, installation methods, temperature, or individual batches. Use grouts with the same batch number whenever possible. Different batch numbers should be dry blended together to obtain color uniformity. Follow ANSI A108.10 grouting practices.
